To conclude

At HOYEZ, the formalization of the Corporate Social Responsibility approach was ultimately a natural outcome of our way of working.

The last decade has seen the introduction of numerous social, economic and environmental practices. We had to identify them in order to share and communicate them with YOU, our stakeholders.

To give credibility to our CSR approach, we have undertaken to be assessed by the EcoVadis label. We have come a long way but we still have more to go. This certification enables us to measure our developments and identify our areas for improvement.
